

MORITZ

MORITZ – His debut album is a veritable goldmine

With his first album, the young singer and songwriter Moritz has not just released a single gold piece but a huge goldmine of finely crafted and very palatable songs. In June 2008, the newcomer surprised everyone with his first catchy pop single “Good Girl”. With the ballad “Can You Hear Me” (May 2010), he then sang his way into our hearts. And with his new album “Piece Of Gold”, he is about to become an inherent part of the Swiss pop music scene.

Moritz produced the album together with the two musicians Marcel Jeker (Vivian) and Martin Kissling (Anshelle). From beautiful ballads which get under the skin to catchy tunes which remind you of Jason Mraz or Méléé, to rocking soul songs in the manner of James Morrison: on his first album, Moritz shows us his versatile creative work. All songs have one thing in common: Each song and all the lyrics are written by one single talented songwriter, something which is not to be taken for granted anymore in today’s music world.

Every song of this promising newcomer is about love, such as the main title song “Piece Of Gold”, which is about Moritz’ love for the passion of music – a passion he can finally express on his debut album. Luckily, “Piece Of Gold” will not be the only gold piece to be discovered...
